

# RAISING THE FUTURE OF CONSTRUCTION

T O R R E N T   W A T E R   M A N A G E M E N T   T O R I S E R

# **WELCOME TO THE FUTURE**

**Introducing The Torrent  
Water Managment TORISER.**

**A true Innovation in Civil  
Engineering; respecting your  
environment and your  
workforce**

# TAKING CARE OF YOUR WORKFORCE & MAXIMISING PROFIT

**6kg**

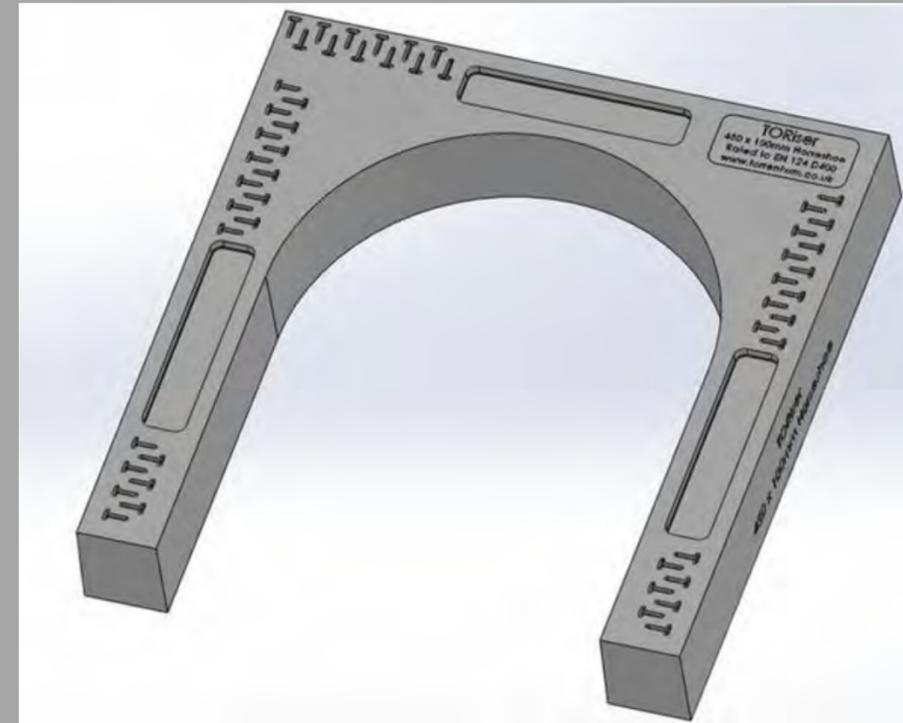

Max. Weight

**80%**

lighter than the  
alternative

Each TORiser units weighs less than 6kg, making site install a one person job.

Transport costs are significantly reduced. The ultra light weight design allows for significantly easier movement wether its on site, on the road or in your yard.

# STRENGTH IN DESIGN

## HEAVY DUTY STRENGTH

Each TORiser unit has been designed with strength in mind - independently tested to excess of 40t D400 loading, you can be confident this product isn't going to let you down!

Perfect for Roads, Car parks, Loading bays and anywhere a high strength riser is required

**D400**

**LEARN MORE**

# 'T' MARKS THE SPOT

## TORiser 'T' GRIP

As well as strength the Torrent TORiser offers unparalleled stability. Torrent T-GRIP allows the mortar to gain a strong key ready for the next riser or cover and frame to be laid.

TORiser can be laid using standard sand & cement bedding mortar or if specified polymer modified bedding mortar.

# CUT THE WASTE

## 01. WASTE

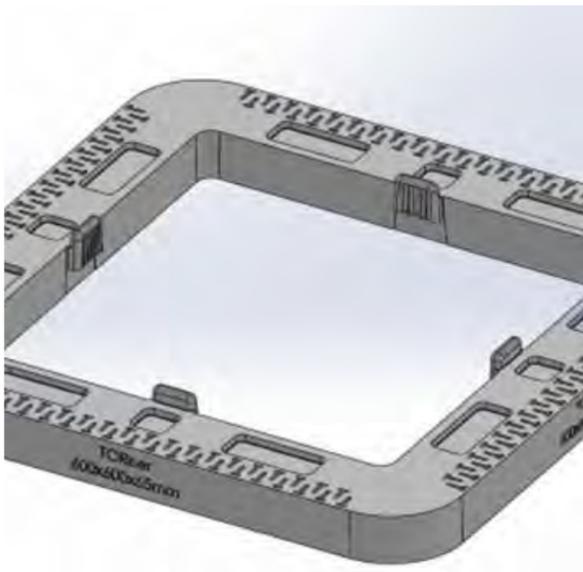

The new innovative TORiser seating ring system has been developed to reduce weight and waste which is an all too common issue with the concrete products currently being used. Reducing breakages on site and while in transit means reduced costs for skip hire.

## 02. RECYCLE

TORiser is made from a unique recycled composite material with a carbon negative filler. Making TORiser the sustainable choice. Lighter products mean more per pallet or load. In fact up to 80% more products. Reducing lorry movements for deliveries and taking away the requirement for machinery to move materials on site. All helping to reduce Carbon emissions
